Payments.

Our site is connected to online acquiring, and you can pay for the Service bank card Visa or Mastercard. After confirming the selected Product or Service, a secure window will open with a payment page processing center UnitPay, where you will need to enter your bank card details. For additional authentication of the card holder protocol is used 3-D Secure. If your issuing bank supports this technology, you will be redirected to its server for additional identification. For information about the rules and methods of additional identification please contact the Bank that issued your bank card.

Online payment service is carried out in accordance with the rules of the International payment systems Visa and MasterCard on the principles of confidentiality and security of payment, for this purpose the most advanced methods of verification, encryption, and data transmission over closed communication channels are used. Entering data bank card is made in a secure window on the payment page UnitPay.

In the fields on the payment page is required to enter the card number, cardholder name, card expiration date, 3-digit security code (CVV2 for VISA or CVC2 for MasterCard). All the necessary data is displayed on the surface of the bank card.

CVV2/ CVC2 is a three-digit security code on the back of the card.

Then in the same window you will open the page of your issuing bank for entering the 3-D Secure code. If you do not have a static 3-D Secure code configured, it

will be sent to your phone number via SMS. If the 3-D Secure code did not come to you, you should contact your issuing bank.

3-D Secure is the most advanced card payment security technology on the Internet. It allows you to uniquely identify the authenticity of the cardholder making a transaction and minimize the risk of fraudulent card transactions.

Security guarantees

UnitPay processing center protects and processes your bank card data according to PCI DSS 3.0 security standard. Passing information to the payment gateway is carried out using SSL encryption technology. Further transmission of information occurs over closed banking networks of the highest level of security. UnitPay does not transfer your card details to us or any other third party. For additional authentication of the card holder 3-D Secure protocol is used.

In case you have any questions about the payment you made, you can contact the customer support service of the payment service by e-mail 1@likemania.com

Security of online payments

The personal information you provide (name, address, phone number, e-mail, credit card number) is confidential and will not be divulged. Your credit card details are transmitted only in encrypted form and are not stored on our Web server.

Security of processing Internet payments is guaranteed by UnitPay. All transactions with payment cards are made in accordance with the requirements of VISA International, MasterCard and other payment systems. When transmitting information, specialized security technologies of online card payments are used, data processing is performed on a secure high-tech server of the processing company.

Payment cards are secure because:

- The authorization system guarantees the buyer that the payment details of his payment card (number, expiration date, CVV2/CVC2) will not fall into the hands of fraudsters, as this data is not stored on the authorization server and cannot be stolen.
- Buyer enters his credentials directly in the authorization system UnitPay, and not on the site of online store, therefore, payment details of the buyer's card

will not be available to third parties.
